

PHOENIX[®]

THE COMPETITION JUST GOT HOTTER

Introducing . . . **PHOENIX** by McDonald Co. Machines

Manual Tape Machines

Quality Construction

Built to crank through the big jobs! This Model M-1 is steel construction with baked enamel finish to prevent corrosion, so it will look and work like new for years. Both sides have a continuous bottom edge crimp that is engineered to give stability as well as rigid construction.

The tape delivery system delivers evenly moistened tape with a smooth precise manual feed. It even has a utility top that stores markers, carton knives, hand stamps etc. which gives both rugged construction and attractive design.

This quality machine is built with the professional in mind!

Phoenix Electronic (E-1)

Are you looking for a tape machine that will keep pace with your increasing production needs now and in the future? Ask your representative to show you the hottest machine on the market, the all new Phoenix Electronic tape machine.
